

Nexus/SL Range Made in the UK

NEXUS/SL SERIES

NEXUS & NEXUS 'i' SERIES

Atacama has always been known for offering outstanding value and the Nexus is no exception.

Made from heavy gauge steel and using high tensile fixings, it can even be mass loaded with Atabites in order to achieve maximum performance. From May 2008 this range will be upgraded to the "i" version which will include our isolation gel pads to further improve its sonic performance.

A choice of 4 height options

Optional top plate available for slim yet deep speaker cabinets. (not illustrated)
Width 130mm (5.1")
Depth 200mm (7.9")

Available in Black, Graphite Metallic and Silver Metallic

See page 15 for Nexus and SL series technical specifications and colour options.

SL SERIES

Our professional range of speaker stands caters for when a larger top plate is required.

Adjustable heavy duty carpet spikes are supplied as standard, with the facility to add top spikes as a option. There are 7 different height models available to suit a wide range of speaker applications.

Atacama isolation gel pads

Are designed to adhere to speaker stand top plates and are made from a high performance polyurethane elastomer which, as well as being non-slip and non scratch, gives excellent sound and vibration resistance. Supplied in packs of 8.

Colour choices as listed for Nexus

REMEMBER!

Atabites

Atabites is high density filler designed for mass loading of speaker stands. They are delta shaped chips, 3 times denser than sand which interlock together creating minimum air gaps. Supplied in 9kg (20lbs) tubs.
