

Pneumatic Seat Height Adjustment

- Allows quick and easy adjustment
- Regulates height of the chair relative to the floor

Mid Pivot Knee Tilt

- Allows user to recline at a slightly more relaxed angle than conventional center tilt
- Tilt lock out and adjustable tilt tension

Tilt Tension

- Controls rate and ease with which the chair reclines for different weights and strengths of users.

#1. Seat Height – apply pressure to seat and lift lever to decrease seat height and remove pressure and lift lever to increase seat height

#2. Tilt Tension – turn clock-wise to intense tension and reduce tilt, turn counter clock-wise to decrease tension and allow more tilt

#3. Mid Pivot Knee Tilt – turn the lever up to lock right in upright position, turn the lever down to release the lock
