

Crate Divider Panel Installation Instructions

1. When installing the crate divider panel, be sure the panel hooks are facing to the back of the crate. The row of double cross wires face down next to the tray.
2. Hook divider panel around the left side panel of the crate and then push right side panel inwards, hooking into place.
3. Clips - How to open and close. To open clip one needs to use two hands, place thumb and forefinger on each end and twist or slide clip to open. To close, just squeeze ends together. (Open and close clips before using on crate.) **For dividers without hooks, use plastic clips.*

For Your Pet's Safety:
Adjust Divider close to tray -
It must be raised slightly to
remove the tray.
