

Plastic Pet Carrier Instructions

The top and bottom halves of the TA20 through TA40 are exactly the same. Handles will come with the TA20, TA24 and TA26. If there is not a handle, either piece will work for the top or bottom.

1. To assemble the pet carrier turn the top piece over the bottom piece and align the holes up with each other. Starting with the hole to the right of the door opening (fig. 1) work your way counter clockwise around the carrier inserting the side locks (fig. 2) in each hole and turn the parts 1/4 turn to the right or the left to lock. Do this for the first 11 parts.

2. After installing the eleventh fastener (fig. 1) stop and install the door, then put in the remaining 3 side parts.

3. Clip the feed & water bowl to the door or side of carrier.

TO OPEN AND CLOSE THE DOOR, squeeze the latch rods together (fig. 3) and pull on the door. To close, squeeze the rods together and push the door shut then release the rods. Be sure they engage the holes in the top and bottom of the carrier.
