### Natural wake-up sounds

- Choice of 4 natural and pleasant wake-up sounds

### Dusk simulation

- Drift to sleep with gradually dimming light and sound

### Light wakes you gently

- Gradual light prepares your body to wake up
- Energy saving lamp

**PHILIPS**

sense and simplicity

# Highlights

## 300 Lux light intensity

The sensitivity to light differs a lot per person. In general, when using a higher light intensity a person needs less time to become fully awake. The light intensity of the Wake-up Light can be set up to 300 Lux. This makes sure you can wake up to the light intensity that suits your personal preference best.

## 4 natural wake-up sounds

At your set wake-up time, you will start hearing a natural sound or the selected radio station. It starts out quietly and takes a minute and a half to reach the volume level you selected. There are four sounds you can choose from: morning birds in the forest, a relaxing beep, the sounds of the African jungle or soft chimes in the wind. The gradually increasing sound will make the

wake up process even more pleasant, ensuring you are never rudely woken up.

## Dusk simulation

The gradual decreasing light and sound help you to drift to sleep. You can set your preferred time for the duration of the dusk simulation.

## Energy saving lamp

Wake-up Light is the only dawn simulator that makes use of an energy saving lamp. It consumes up to 24% less energy compared to a Wake-up Light with a normal light bulb.

## Light wakes you gently

Light gradually increases in 30 minutes before your set wake up time. Light falls on your eyes and positively affects your energy hormones,

preparing your body to wake up. This makes waking up a more pleasant feeling.

## Digital FM radio

The built-in digital FM radio lets you wake up to your favourite songs or news station every day. Just select your favourite radio station, and at your set wake-up time it will start to play, at first gently, gradually increasing over ninety seconds to the volume level you selected.

## Great sound quality

The speaker in this Wake-up Light is backed up by an integrated sound box, assuring a great sound quality when listening to the FM radio or when waking up with the natural wake-up sounds.

# Specifications

## Easy to use

- Anti-slip rubber feet
- Alarm test function
- Snooze button for sound and light: 9 minute(s)
- Compact size: Limited bedside table space required (14x19.5cm)
- Electricity back-up function: 5 minute(s)
- User interface: 3 wheels (push & turn), 1 switch

## Technical specifications

- Voltage: 110 V
- Frequency: 60 Hz
- Cord length: 200 cm
- Type of lamps: Philips Energy Saving Lamp
- Insulation: Class II (double isolation)
- Lifetime of lamps: expected >6.000 hours

## Safety

- Cenelec certified
- UV-free: No UV radiation

## Logistic data

- Country of origin: China
- CTV code: 884348060

## Display

- Display brightness control: 4 settings, increases to max during 30 min wake-up
- Hidden LED display: Invisible display projected to the product

## Sound

- Digital FM radio
- Wake-up sounds: 4 natural wake-up sounds, Digital FM radio
- Sound off function: Option to mute sound immediately
- Premium sound box: Integrated sound box
