## WHEEL DESCRIPTIONS

**12" Wheels:** Perfect for walking on grass, trails or sidewalks. Wonderful for city life where smaller wheels mean a more compact stroller. You will fall in love with the 12" if you have previously owned a conventional stroller.

**16" Wheels:** One of our most popular wheel sizes because of its versatility. It's large enough to handle snow or sand, yet small enough to fit into small places. Perfectly suited for jogging and walking.

**20" Wheels:** Serious runners adore this size because it provides a longer stride. The larger wheel easily handles rough terrain and provides a smoother ride for little passengers.
