

PRODUCT SPECIFICATION

Folding shower seat, Bobrick Model B-5171 (right-hand seat), B-5181 (left-hand seat).

Folding shower seat shall have a frame constructed of type-304, satin finish stainless steel, 16-gauge (1.6 mm), 1-1/4" (32-mm) square tubing, and 18-gauge (1.2-mm), 1" (102-mm) diameter seamless tubing. Seat shall be constructed of one-piece, 1/2" (13-mm) thick, water-resistant, ivory colored solid phenolic with black edge. Clearance between back of shower seat and wall shall be 1-1/2" (38 mm) to comply with ADA Accessibility Guidelines (ADAAG). Seat supports shall not come into contact with floor. Seat shall be able to lock in upright position when not in use. Seat shall be attached to wall by two 3" diameter mounting flanges constructed of type-304, 3/16" (5 mm) thick stainless steel with satin finish. Manufacturer's service and parts manual shall be provided to building owner/manager upon completion of project.
