

FORECAST

LIGHTOLIER

Forecast Lighting will be prominently featured on the season premiere of **Extreme Makeover/ Home Edition** on September 30 (7PM East, 6 PM Central) on ABC. The episode airs from Hawaii and features extensive Forecast product placement, notably our new bamboo Hanalei Bay collection. The Forecast logo will also appear on air!

Another Forecast related story line involves glass artist Rick Strini, (shown at right with his wife Debra) whose work is featured in our last two collections. Rick created the spectacular custom chandelier shown at right in his Maui studio. Rick created the 210 pieces of glass in varying colors to suggest the ocean, and Forecast brought it to light!

Rick also is a featured guest in the episode with a film crew visiting us at his studio, and then showing the fixture installation at the newly constructed show home in Oahu.

Keep a close eye out for a Forecast employee that appears in a scene with show star Ty Pennington...
