

COMFORTLIFT

AN ISO 9001 CERTIFIED

Leather, fabric and vinyl carefully selected for wearability, seam strength, beauty and comfort.

Extra-long, sinuous spring suspension system used in seats and back for "sink into" comfort.

KD back design allows easy removal of back when transporting.

Extra plush Reflex foam seat cushion, features dynamic rebound and incredible durability (backed by a 100% customer satisfaction guarantee).

24 volt "low voltage" motor with aluminum drive tube and brass bushings allows smooth, quiet and durable operation.

Insulated contact pads reduce vibration and noise during operation.

Adjustable metal leg glides can be raised or lowered for leveling and increased stability.

14 gauge tubular unitized lifting base with powder coat finish provides superior strength and durability (backed by a limited lifetime warranty).

Computer frame design and cutting provides puzzle type attachment that creates incredible strength and durability.

Deep padded arms & back are filled with premium conjugate fiber and/or foam. Designed for maximum comfort and durability.

Hand control with paddle switch allows easy and smooth control when operating. Convenient key "lock out" disables chair when not in use.

Seams reinforced in all stress areas.

Fully removable chaise pad with zippered back allows easy regulation, cleaning or replacement.

Heavy padded ottoman with foam and/or fiber for extra added comfort.

10 foot power cord with external transformer keeps high voltage away from the chair while allowing plenty of cord for chair placement.

9 volt battery back-up system allows operator to close chair in the event of power failure.

Hardwood used in all stress areas reinforced with dowels, glue, screws and staples where needed. Backed by a 3-year warranty.
