

Verstile LED Solutions

With the addition of eight new models for 2008, Kichler® LED Accent Lights are now available in three wattages (3-W, 6-W and 9-W) and three beam spreads (10°, 35° and 60°). Unequaled in the industry, this range of wattage and beam spreads allows for customized light planning and selection and reduces the need for cowl.

A selection of mounting options and colored lenses makes these low-profile accent lights totally versatile.

Available in long-lasting die-cast aluminum or solid brass housings, this new LED series features a threaded mounting stem and locking nut and includes an integral driver for ease of installation.

Use these LED accent fixtures for up or down lighting, to accent detail, staked or flange-mounted for deck and rail lighting.

SELECTION GUIDE

| | 10° SPREAD | 35° SPREAD | 60° SPREAD |
|------------|---------------|---------------|------------------------------|
| 4.5-WATTS | 15731 | 15732 | 15710 & 15715 SEE PAGE 89 |
