

Calligaris Fabric Care Instructions

Fabrics: Dakar, Leo, Libra, Mambo, Martinique, Rhodes, Salsa, Tao –

These fabrics should be cleaned with pure solvents. You may use petroleum distilled-based products such as Engine, Carbona, Renuzit or similar. CAUTION: an excessive shrinking can be caused by using water-based or detergent-based solvent cleaners.

Fabrics: Nadir and Satin –

These fabrics should be cleaned using the foam of a water-based cleaning agent or with a petroleum distilled-based product such as Engine, Carbona, Renuzit or similar. These fabrics are also inherently stain resistant. Do not use stain protection solutions such as DuPont, Guardian, or Scotch guard-type products. Spills should be wiped immediately with a clean white cloth dampened in water.
