Design: Ramón Benedito  
2006

Ramon Benedito es un gran diseñador y además, un conformista. Quizá lo uno sea consecuencia de lo otro. No sé. Tampoco sé en qué orden aparecen las buenas ideas en su cabeza ni cómo consigue combinarlas con tanto ingenio. La próxima vez que tomemos un café me tendrá que decir si Luccas es una luz de acento con vertiente ambiental o un aplique decorativo con un led de uso focalizado. Hasta que llegue ese momento, me gustan sus interrogantes.

Ramon Benedito is a great designer as well as a nonconformist. Perhaps one things is the consequence of the other. I do not know. Neither do I know the order in which the good ideas come to his head or how he manages to combine them so ingeniously. Next time we have a coffe together, he will have to tell me whether Luccas is an accent light with a spotlight atmospheric side or a decorative light fitting with a spotlight led. Until that moment arrives, I like the questions he provokes.
