Mount Installation

NOTE: The installation instructions that are contained in this manual refer only to the RTM-L. The installation instructions for the various bases that are used with the RTM-L will be included with those products.

NOTE: Prior to installing the RTM-L, the mounting configuration must already be assembled (base, support poles, etc.).

1. Slide the mounting block over and down the support poles.

2. To secure the mounting block to the support poles, tighten the four set screws (located on each side of the mounting block), using the 5/32" Allen wrench (supplied).

Universal Mounting Bracket Assembly

1. Place the universal bracket bar and the universal brackets on a flat surface.
2. Slide the universal brackets onto the universal bracket bar (as shown below) with the set screws facing up. At this time, do not tighten the set screws that are located on the universal bracket.
3. Place the display on a soft, flat surface, face-down. Next, place the universal bracket assembly on the back of the display, with the universal brackets resting directly over the display mounting points.
4. Once the desired position has been determined, place the Griplate™ washers over each mounting point and secure them using the appropriate hardware (see Page 5).

NOTE: For the two upper mounting points, the Griplate™ dimples must be facing up. For the two lower mounting points, the Griplate™ dimples must be facing down.

5. At this time, center the universal bracket bar and tighten the set screws that are located on the universal brackets.

WARNING: IT WILL TAKE TWO PEOPLE TO COMPLETE THE NEXT INSTALLATION STEP.

3. Lower the universal bracket bar and display into the cradle (as to the left).

Nylon Sleeve

NOTE: The circular portion of the universal bracket bar must rest inside the nylon sleeve. If seated improperly, the operation of the RTM-L will be hindered and the nylon sleeve will become damaged.

Knurl Knob Mounting Points (a knurl knob may be placed in either mounting hole)

4. Insert an M6 knurl knob into the knurl knob mounting point and tighten.

5. Tighten the two (2) Phillips head screws (located on the side of the mounting block) once the final position is attained.

Display Orientation

The RTM-L will allow the user to adjust the display a full 360°.

WARNING: BEFORE ROTATING THE RTM-L, MAKE SURE THAT THE M6 KNURL KNOB IS SECURELY FASTENED TO THE RTM-L. ALSO, PLEASE MAKE SURE YOU ALLOW ENOUGH CABLE AND WIRE CLEARANCE FOR FULL ROTATION.

1. To adjust the RTM-L, rotate the display either clockwise or counter-clockwise.

2. Tighten the two Phillips head locking screws (see Step 5, Page 10).

Tilt Positioning

Rotate the crank handle to tilt the RTM-L:
Down - Clockwise
Up - Counter-Clockwise

The RTM-L has the ability to tilt 10° down.

The RTM-L has the ability to tilt 35° up.

1. Once the position has been locked down, use an Allen wrench to take off the crank handle.
2. Once the crank handle has been removed, re-attach the crank handle, but in the opposite direction from what it was. This is the storage position for the handle.
