

Important: Always disconnect the power before installing or replacing bulb and before cleaning or other maintenance.

This light should be installed by a licensed electrician

LAMP INSTALLATION AND ASSEMBLY

1. Shut off power to the outlet box. (fig. A)
2. Attach the universal mounting plate and cross bar to the outlet box using outlet box screws.
3. Attach the six panels to the fixture body using the panel screws. Be sure the three panels with the cutout fit around the stem. Be sure the panels on opposite sides of the fixture body are facing the same direction.
4. Determine the height at which the fixture is to be hung. Screw stem sections together to achieve desired length.
5. Screw canopy onto last stem section.
6. Make appropriate electrical connections using wire nuts. If there is no green ground wire from the outlet box, then connect the fixture wire to the mounting plate with the green screw provided. Place connections in outlet box.
7. Attach canopy to cross bar with canopy screws.
8. Install G bulbs. (not included)
9. Restore power to the fixture.
