

**This light should be installed  
by a licensed electrician.**

### CAUTION

- 1) Indoor use only
- 2) Connect to 120V~60Hz
- 3) This product should be installed by a licensed electrician
- 4) Temperature of the bulb gets hot. Do not touch the bulb after the light fixture has been turned on.

### LAMP INSTALLATION AND ASSEMBLY

1. Shut off power to the outlet box.
2. Remove mounting bracket from canopy. Attach the bracket to the outlet box using outlet box screws.
3. Determine the height which the fixture is to be hung. Adjust the length of the steel cable and power cord. The steel cable can be released by pressing the cable grip.
4. Make appropriate electrical connections using wire nuts. If there is no green ground wire from the outlet box, connect the fixture ground wire to the cross bar with the green screw provided. Place connections in outlet box.
5. Align the slots in the canopy with the mounting screws on the bracket. Push the canopy over the screws and rotate to lock. Secure canopy by tightening the mounting screws.
6. Spread the support arms and carefully insert the ends through the holes of the glass. Press a rubber ball on each arm to secure the glass. The angle of the glass can be adjusted by moving the position of the rubber balls.
7. Insert bulb and restore power to outlet box.
