

Speakman showerheads turn a shower into an experience.

For over 90 years, Speakman Anystream® showerheads have been turning simple showers into great bathing experiences. Designed with large spray adjusting handles, they satisfy any individual taste, from drenching full-body flood sprays, to invigorating massage action for easing sore muscles.

Speakman showerheads are installed in many of the world's finest homes, hotels, estates and country clubs. They specify Speakman showerheads because they deliver the spray volume and patterns required for a relaxing shower experience, and because they are built to last for generations. In fact, many Speakman showerheads installed 50 years ago are still providing their owners with brisk, invigorating showers every day. Like the ones in the White House, for example.

At Speakman, we make a complete line of showerheads and accessories to fit any installation and budget, from our top-of-the-line all-brass Anystream showerheads to our advanced Anystream 2000® hand-held massage models. And we have a wide selection of wall-mount and compact water-conserving designs that still deliver a satisfying, full-flow shower at lower water-use rates.

S-2005-HB

5-Jet Showerhead with Massage Action

Speakman is pleased to introduce the next generation of Anystream 2005 shower products designed exclusively for the Hospitality industry. The new S-2005-HB showerhead is still the only water-saving, full-size, multi-featured showerhead that provides invigorating, full-flow intensity at a wide range of water pressures - only better! The center sprays have been enhanced to provide brisk or regular *pulsating* massage streams. Speakman's patented spray jet technology provides strong, forceful or gentle spray by simply turning the side adjustment handle. Another practical feature added to this product is the EZ Connection for connecting the showerhead to the shower arm. Simply screw the unit on the arm and hand tighten. Requires no tape, no tools, no time, no trouble.

Give your guests the luxury of improved showering pleasure!
