

SIMPLY SOLID

by UNIVERSAL®
FURNITURE

TOPS AND DRAWER FRONTS

All tops and drawer fronts are crafted from the finest solid woods selected for grain and character

Solid wood components are optimally sized to minimize movement

Tops are secured to cases using floating cleats to allow seasonal movement

DRAWERS

All solid wood drawer sides and backs are tinted and sealed helping to eliminate moisture infiltration and providing a pleasing look and feel

- Quality wood-on-wood drawer guides with friction stops
- Corner blocks provide added rigidity to all drawers
- English dovetail construction on front and back of drawer box

FINISHING

Multi-step hand rubbing and hand distressing give a rich, dimensional finish enhancing the beauty and character of the natural wood grain

Fully sealed undersides and backs provide a moisture barrier to even unseen surfaces

CASE CONSTRUCTION

Solid wood tops are secured using "floating" anchoring system

Screws are seated in slotted holes in cleats and corner blocks to allow seasonal movement while still holding firm

Full dust panel construction

Frames utilize authentic mortise and tenon joinery for a precise fit and ultimate stability

ENDS AND SHELVES

Case ends, large panels and adjustable shelves are made with a solid wood core for strength with multi cross ply veneers applied to both sides for balanced stability and beauty

Solid wood rims are applied to all shelf edges and exposed panels for added durability and beauty

End panels, shelves and large panels utilize randomly matched quality veneers over solid wood core for strength and beauty

SPECIAL FEATURES

Wood with less than 10% moisture content monitored throughout the manufacturing process ensures stability

Our finishes are formulated to enhance the surface feel and beauty

FINE HOME FURNISHINGS CRAFTED IN SOLID WOOD
