Assembly Instructions for Vision Mount™ VM100/200 Adapter

## Parts:

- 1 VM100/200 Adapter - a
- 4 M5 Flat Head Machine Screws - b
- 4 Nuts - c
- 6 M4 x 10mm Phillips Pan Head Machine Screws (not shown) - For use with televisions not compatible with the wall mounts supplied hardware.

## VM1 Assembly:

1] Attach the VM100/200 Adapter to the four outer holes on the star shaped Monitor Mount using the M5 Flat Head Machine Screws (b) and the Nuts (c) as shown in diagram 1.

**NOTE: Make sure the M5 Flat Head Machine Screws (b) sit inside the countersunk holes on the VM100/200 Adapter (a) so the head of the screw is flush with the flat side of the plate and that the nuts are very tight.**

2] Attach the television to the adapter and follow the instructions provided with your LCD wall mount.

## VMF Assembly:

1] Attach the VM100/200 Adapter (a) to the four outer holes on the VMF Monitor Mount using the M5 Flat Head Machine Screws (b) and the Nuts (c) as shown in diagram 2.

**NOTE: Make sure the M5 Flat Head Machine Screws (b) sit inside the countersunk holes on the VM100/200 Adapter (a) so the head of the screw is flush with the flat side of the plate and that the nuts are very tight.**

3] Attach the television to the adapter and follow the instructions provided with your LCD wall mount.
